

# BIO MOLECULAR PEPTIDE THERAPIES

- Muscle-building & Slimming
- Joint Health & Anti-Inflammation
- Sexual Health & Libido Enhancement
- Aesthetic Tissue Regeneration
- Total Face & Body Whitening
- Plaque Control Against Fatty Liver, Cardio Degeneration & Dementia
- Immunotherapy With GcMAF + HMW Hyaluronic Acid
- Biological Balance Through Detoxification

[www.labrms.com](http://www.labrms.com)

Peptides are short chains of 20 or fewer amino acids, shorter than in proteins. Natural cellular and tissue regeneration involve peptide chains and they can either induce or inhibit biological effects, acting as agonists or antagonists in physiological systems. When used therapeutically, peptides - recognized within the human physiology -

are highly specific in their activity, and effective at low doses with no toxicity and minimal side effects.

The administration of peptide bio-regulators enables effective prevention of premature aging and therapy of age-related disease.

# REGENAPEP

## Joint Health & Anti-Inflammation

- SUPPRESS INFLAMMATION
- PAIN RELIEF
- CHONDRO PROTECTION
- CARTILAGE REGENERATION
- REDUCE DEPRESSION

REGENAPEP is a new TGA-certified joint health supplement that acts as an advanced reliever of musculoskeletal, rheumatic and arthritic pain, and a preventive system against potential onset of arthritis by alleviating conditions associated with early-stage musculoskeletal and joint inflammation.

This formula contains a unique active ingredient - colostrum (enriched with interleukin-1 receptor antagonist peptides), and a number of purified botanical extracts such as turmeric, white willow, devil's claw, boswellia serrate and ginger. All of the bioactive components in REGENAPEP's formula interact synergistically to promote anti-inflammatory effects and pain relief.

### Indications:

Disease	Pathological Relation to Chronic Inflammation
Alzheimer's disease	Inflammatory cytokines induce autoimmune reactions
Arthritis	Inflammatory cytokines destroy articular cartilage and synovial fluid
Osteoarthritis	Cytokines block chondrocyte production and regeneration, causing cartilage erosion.
Fibromyalgia	Inflammatory cytokines destroy muscle tissue, causing chronic pain
Lupus	Inflammatory cytokines induced autoimmune attack
Fibrosis	Inflammatory cytokines attack the wounded tissues, causing normal tissues to be replaced by stiff fibrous connective tissues.
Rheumatism	Chronic inflammation leads to overproduction of inflammatory factors
Soft tissue impairment	Soft tissue trauma leads to an increase in inflammatory cytokine production
Sport Injury	Repetitive injury leads to excessive production of pro-inflammatory cytokines
psoriasis	Inflammatory cytokines lead to development of dermatitis
Chronic pain syndrome	Chronic pain syndrome triggers overproduction of inflammatory cytokines and thus leads to ineffectiveness of conventional analgesics and anti-inflammatory drugs.

### Available in:

**60 tablets/pack**

### Corrective protocol:

2 tablets per day.  
1 tablet per intake.  
30 minutes before meal.

**30 tablets/pack**

### Preventive and maintenance protocol:

1 tablet per day.  
30 minutes before meal.

### Recommended Users

REGENAPEP is recommended for patients with early to mid-stage arthritis and non-arthritic adults seeking to maintain good musculoskeletal and joint health.

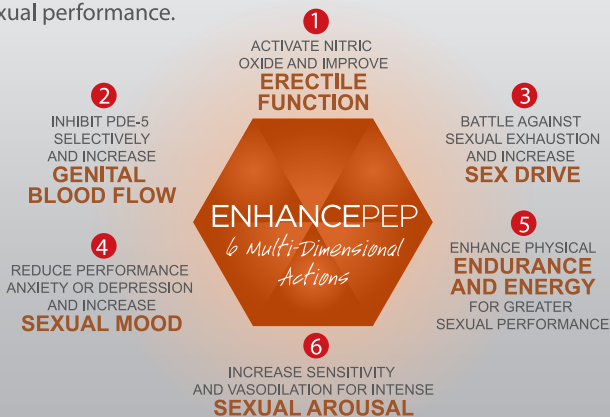

# ENHANCEPEP

## Sexual Health & Libido Enhancement

- INCREASE penile and vaginal blood flow, ejaculatory frequency, cognitive performance, physical endurance and energy.
- INTENSIFY sexual desire, genital sensitivity and arousal.
- IMPROVE sexual mood, male and female sexual function and management of performance anxiety and depression.

ENHANCEPEP is a new TGA-certified sexual health supplement that acts as an advanced libido booster and sexual performance enhancer, and a preventive system against potential onset of erectile dysfunction and sexual disorders for both men and women.

This formula contains a unique active ingredient, colostrum enriched with alpha-melanocyte stimulating hormone peptides (alpha-MSH or melanotropic peptides), bioflavonoids, nicotinic acid and a number of purified botanical extracts such as, cynomorium songaricum, turnera diffusa, epimedium brevicornum, epimedium sagittatum, paullinia cupana. All of the bioactive components in ENHANCEPEP's formula interact synergistically to increase sexual desire, promote optimized erectile function and improve overall sexual performance.

ENHANCEPEP is a pro-sexual oral supplement that may complement, and may not substitute any existing treatment plan offered by medical practitioners.

### Available in:

**60 tablets/pack**

### Corrective protocol:

2 tablets per day.  
1 tablet per intake.  
30 minutes before meal.

**30 tablets/pack**

### Preventive and maintenance protocol:

1 tablet per day.  
30 minutes before meal.

### Recommended Users

ENHANCEPEP is recommended for men and women seeking to maintain good sexual health with optimized libido levels, and patients with erectile dysfunction or other sexual disorders.

Peptides control gene expression and protein synthesis, thus preventing age-related accumulation of quantitative structural and functional alterations that cause premature aging and diseases.

# MYOPEP

## Muscle-Building & Slimming

MYOPEP is a new TGA-certified weight loss supplement that combines unique active ingredient - colostrum (enriched with follistatin and leptin peptides) with purified botanical extracts such as Chinese cinnamon, Siberian ginseng, bladder wrack, white willow, guarana and cascara buckthorn to help supercharge the body's fat loss process and maximize\* diet and exercise results.

\*Best results are achieved when MYOPEP is combined with a calorie-reduced diet and a regular exercise programme.

### Principal Indication

MYOPEP supports weight loss with ingredients that have been scientifically demonstrated to increase energy, decrease fat absorption, stimulate metabolism, enhance muscular strength and endurance, and increase fat oxidation.

MYOPEP is formulated with ingredients that may counteract muscular degeneration for anti-aging (preventative system for sarcopenia).

### Recommended Users

MYOPEP is recommended for overweight patients generally with BMI index of 25-30, and those seeking to achieve greater muscle definition and lean muscle mass. Not for children under 12 years of age.

## REAL PEOPLE. REAL SUCCESS

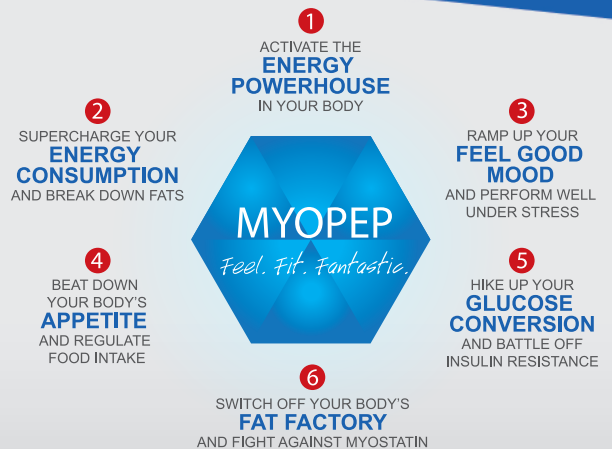

Watch the videos of these amazing men and women who found real success with Myopep

**Dr. Kent Holtorf, MD**  
Medical Director  
Holtorf Medical Group, USA

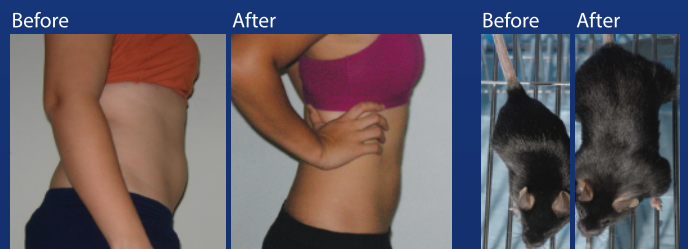

**Dr. Bill V.P.**  
Clinical Pharmacologist  
Australia

### Lasting Effects

Unlike steroids and most of performance enhancers, Myopep has a very lasting effect that does not disappear after supplementation is stopped.

Can be used for domestic pets and even horses participating in equine tournaments.

# Exosomes — forte

Tissue Regeneration for  
Aesthetic and Therapeutic Use

## WHAT ARE EXOSOMES FORTE?

Heralded as the latest advancement in modern stem cell research, Exosomes Forte are a new class of cell-secreted signaling molecules with immense rejuvenative potential.

Mainly responsible for the paracrine stimulation in stem cell therapy, transferring both proteomic and genomic materials between cells to influence cell behaviour and physiology.

- Non-Immunogenic
- Accelerates Cell Renewal and Repair
- Allogeneic Cell Sources
- Naturally Occurring Biologicals in Human Body
- Preferential Homing at Targeted Tissue or Cells
- Intracellular Transfer of Therapeutic Biological Materials

LABRMS has produced exosomes from standardized and established human cell lines under a quality TGA-GMP system.

Our purified exosomes contain rich amounts of proteins, mRNAs, microRNAs and other biologically active compounds for aesthetic and therapeutic use.

## LABRMS Purified Exosomes derived from Human Progenitor Skin Stem Cell

- Whitening Effect
- Botanical
- Non-cytotoxic
- Non-irritant
- Anti-melanoma

# ULTRA WHITE X3 • X1

A Vegetal Solution For  
Total Body & Face Whitening

Ultra White is a powerful whitening peptide proven to rapidly decrease melanin production for a noticeable difference in skin brightness.

Discovered in tomato plant extracts, Ultra White peptide is nature's solution to skin dullness without causing cell deterioration, skin peeling or irritation.

Working subcutaneously, Ultra White peptide effectively binds with muscarinic receptor 2 in melanocytes to inhibit the oxidization of tyrosine.

With the use of the Ultra White, melanin production is arrested, reducing manifestations of dark pigments on the dermal surface.

Research has also demonstrated Ultra White's effect in reducing melanoma-cancer in vivo providing an added long-term benefit to skin-health maintenance.

Ultra White is available in normal strength (x1) and triple strength (x3)

## Product testing on Zebrafish

All Natural GcMAF Forte with High Molecular Weight Hyaluronic Acid (HMW-HA)

- Slow-Release Over 7 Days
- Minimal Side Effects

NATURAL  
COLOSTRUM

GcMAF  
— forte

The New Age of Non-Invasive Cancer Immunotherapy & Cancer Prevention

Individualised Immunotherapy for :

- Autism
- Chronic Fatigue Syndrome
- Complementary immunotherapy for some viral and bacterial infections (Herpes, Lyme, etc.)
- Cancer with Solid Tumours (Breast, Prostate, Colorectal, Ovarian etc.)

The Macrophage Factor

Macrophages ("big eaters" in Greek) are an important type of white blood cell. They patrol the body, eating up foreign invaders and dead cells, and alerting other immune cells to the presence of infections.

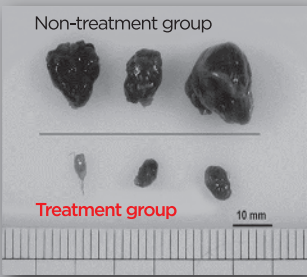

Over 100 scientists have published numerous research papers producing evidence that GcMAF repairs the immune system and can destroy cancer and other infections.

Dr. Nabuto Yamamoto, the founder and director of the Socrates Institute for Therapeutic Immunology is a world-renowned specialist who has studied and published the therapeutic benefits of GcMAF.

Yamamoto found that by injecting patients weekly with GcMAF (a synthesized lab-made protein replacement for MAF), he could raise essential white blood cell counts dramatically, erase indicators of HIV infection and maintain patient remission from HIV for 7 years.

GcMAF Forte therapeutics

- Injectable GcMAF combined with HMW-HA creates a slow-release Forte formula and provides steadily high level of active GcMAF in the body during 1 week after subcutaneous administration. It is proven to be superior to all other available forms of GcMAF and more potent immunotherapy for cancer and infectious diseases.
- Combination with HMW-HA makes it easy for administration avoiding painful frequent deep intramuscular injections.
- GcMAF Forte therapy has strong anti-aging effect and is a strong preventive factor against cancer.

2-in-1

- Heavy Metal Detox
- Oxidative Stress Reducer

HMDetox

Restore The Body's Biological Balance

HMDetox is a mineral supplement designed to reduce toxic heavy metal contents from your system. Made from nanomized mineral silicate and herbal extracts, HMDetox is high in anti-oxidants and is ideal for those looking to detox naturally and maintain longevity. This product is made in Europe.

Ingredients:

- 80% European-made Nanomized Natural Organic Food Grade Mineral Silicate, with calcium, and magnesium
- 20% Natural blend of plant-based detoxifiers: Coriandrum sativum, Nigella sativa and Chlorella Vulgaris.

Benefits of HMDetox

- Aids in heavy metal detoxification
- Antioxidant
- Anti-microbial
- Regulates electrolytes
- May delay signs of aging caused by oxidative stress
- Improve nutrient absorption in gastrointestinal tract
- Reduces health risks associated with heavy metal toxicity
- Improve mental and physical functions

HMDetox as Heavy Metal Detoxifier

HMDetox is made of metal toxin binding agent and mobilizer. It carries a natural negative (-) charge able to attract and trap positively charged (+) heavy metals and toxins. Heavy metal and toxin are flushed out through excretory channels. This is known as a chelation process.

HMDetox as Antioxidants

HMDetox serves as a great antioxidant and contains both natural mineral and plant-based antioxidants. Its main mineral compound is made of grid-like structure that does not only trap toxins and heavy metals, but also free radicals found in the human body. Free radicals (highly reactive molecules containing at least one unpaired electron) are responsible for the oxidation (loss of electrons of molecule, atom or ion) of normal cells in the body, which consequently damage cells, tissues, and their normal function, and contribute to illnesses and premature aging. HMDetox scavenges free radicals to eliminate their impact on the body.

Its plant-based ingredients are also high in antioxidative properties. Together with nanomized mineral silicate, they work in the gastrointestinal tract trapping dangerous substances without burdening the metabolic processes.

HMDetox, along with the trapped the harmful substances is eliminated from the body naturally.

# PLAQX FORTE & PLAQX EXTRA FORTE

## Therapy for your Heart, Liver, Kidney & Blood Vessels

Before and after image of a patient undergoing phosphatidylcholine therapy. The patient was insulin-dependent with diabetes mellitus suffering from an acute bout of vasculitis affecting his toes.

**NEW 2021 STRONGER FORMULA**

**PlaqX Extra Forte**  
1200mg 30 softgels

**PlaqX Forte**  
900mg 30 softgels

**PlaqX Forte (Infusion)**  
25ml & 50ml

### Why You Need PlaqX

Our blood vessels transport oxygen and vital nutrients to various parts of the body. Hindering this basic, life-supporting functionality is plaque, which accumulates over time from substances such as fat and cholesterol, causing the blood vessels to get clogged up. This results in serious and potentially fatal diseases – including strokes and heart attacks.

LAB RMS PlaqX Forte or PlaqX Extra Forte Softgels are specially formulated to help clear out this plaque, effectively acting as a personal clean-up crew for our blood vessels!

### Benefits of Taking PlaqX

- ✓ Clears out plaque build-up
- ✓ Promotes healthy total cholesterol level
- ✓ Increases HDL (High Density Lipoprotein)
- ✓ Improves liver function
- ✓ Rejuvenates cell membranes
- ✓ Lowers LDL (Low Density Lipoprotein) and VLDL (Very Low Density Lipoprotein)
- ✓ Lowers Triglycerides
- ✓ Improves kidney function
- ✓ Maintain cell membrane integrity and fluidity

### Available in Two Dosage: PlaqX Forte & PlaqX Extra Forte

Both PlaqX Forte and PlaqX Extra Forte contain the same active ingredients – however, PlaqX Extra Forte is designed for individuals who require a higher concentration of high-purity Phosphatidylcholine.

Product specification	LAB RMS PLAQX FORTE	LAB RMS PLAQX EXTRA FORTE
Active Ingredients	Phosphatidylcholine	
Bioactives	Phosphatidylcholine	
Unique selling proposition (USP)	High concentration Phosphatidylcholine	Higher concentration of high purity Phosphatidylcholine
Active ingredient dosage per capsule	900mg	1200mg
Recommended dosage	1 or 2 softgels per day. 30 minutes before meal.	1 softgels per day. 30 minutes before meal.
Country of origin	USA	Switzerland
Storage	Room temperature, keep away from sunlight	
Contraindication	May cause stomach upset and diarrhoea. Symptoms may subside after two (2) weeks of supplementation. Not recommended for those with severe allergy to soy and soy products.
